Spring 2016

EDGE PROJECT

Project Summary

I evaluated and implemented changes and improvements to the security system at The Hope Chest in St. George UT. The Hope Chest is a non-profit thrift store that provides the majority of funding for a Women's Crisis center in Southern Utah. They were experiencing significant amounts of shoplifting that have since been minimized.

Project Highlights

- 2 new exterior cameras
- 1 new and 2 replaced interior cameras
- Performed system Core upgrade
- Conducted volunteer training
- Repaired camera power relay

From My Journal

"Today I ran over 60ft of Cat6 cable through the ceiling to supply video to the new remote monitor I added to the rear prep room" 1/03/2014

"Today was especially exciting because I had the opportunity to upgrade the system core with a 1TB Motion triggered unit that was donated" 1/15/2015

The Hope Chest store front in St. George, UT.

Above is the old system and below is the system I upgraded it too. Both systems use BNC connectors for the camera wiring so I was able to utilize all the existing cabling and Cameras.
